Portfolio

Summary

Motivated MERN Stack Developer with hands-on experience in building dynamic and scalable full-stack web applications. Passionate about writing clean, efficient code and leveraging modern technologies to develop user-friendly and high-performance solutions that solve real-world problems.

Technical Proficiencies

- **Languages:** JavaScript, TypeScript
- **Frontend:** HTML, CSS, Bootstrap, Tailwind CSS, shadcn, React, Redux
- **Backend:** Node.js, Express.js, MVC Architecture, JWT, OAuth 2.0, Nodemailer, multer, Razorpay, axios, Socket.io, WebRTC
- **Databases:** MongoDB, PostgreSQL, Firebase
- **Cloud & Deployment:** AWS, Hostinger, Ngrok
- **Tools:** Git, GitHub, Postman, Figma
- **Other:** Data Structures & Algorithms (DSA)

Projects

Construction Management System

[Live](#) | [GitHub](#)

- Developed a robust construction management platform with dynamic dashboards and granular, role-based access for Admins, Site Managers, Supervisors, Architects, and Clients.
- Implemented multi-role authentication with secure 2FA for admins and custom workflows for role-specific account creation and onboarding.
- Designed a smart site setup flow—blueprint uploads, architect approval, and automated milestone generation with dynamic tracking.
- Built a centralized stock management system featuring site-wise inventory tracking, inter-site transfers, and purchase billing with admin-verified receipts.
- Integrated quotation and invoice handling, vendor comparison tools, and admin-controlled salary distribution for company-wide transparency.
- Enabled real-time reporting with advanced filters (date, site, stock type, project phase) and smart dashboards with animated visuals and budget analytics.
- Implemented secure KYC/government document uploads (e.g., land deed, NOC) and automated cron jobs for reminders and critical checks.
- Technologies: React, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, Axios, JWT, Multer, Nodemailer, CronJob, dotenv.

E-commerce Application (CellCity)

[GitHub](#)

- Developed a responsive e-commerce platform with a secure admin panel for efficient product, order, and user management.
- Integrated authentication using JWT and OAuth, with secure email notifications via Nodemailer.
- Implemented payment processing with Razorpay and file handling with multer.
- Designed and implemented a robust cart management system with real-time updates for seamless user experience.
- Developed a flexible discount system, incorporating coupon codes and dynamic offers for seasonal promotions and personalized deals.
- Technologies: HTML, CSS, Bootstrap (EJS), Node.js, Express.js, MongoDB, JWT, OAuth, Nodemailer, Razorpay, multer, bcryptjs, cookie-parser, dotenv, Morgan, PDFKit.

Real-Time Chat App

[GitHub](#)

- Built a feature-rich chat platform with real-time messaging, smart notifications, and customizable themes including dark mode.
- Enabled secure user authentication with JWT and effective profile management, with media handling via multer.
- Implemented real-time communication using WebSockets, ensuring seamless and instant message delivery.
- Designed an intuitive user interface with React and Tailwind CSS, providing a smooth and modern chat experience.
- Technologies: React, Tailwind CSS, MongoDB, Express (Node.js), WebSockets, JWT, Multer.

POS Billing System (PKS Traders – Freelance)

(Private Deployment)

- Developed a custom POS billing solution for retail stores, with real-time invoice generation, automated receipt printing, and UPI payment integration.
- Built a barcode scanner-powered POS interface supporting retail/wholesale modes, credit sales with auto debt tracking, and QR code payments.
- Designed dashboards with branch-level analytics, sales filters (daily–yearly), and low stock alerts to support operational decisions.
- Implemented product, supplier, employee, and customer modules with advanced search, stock control, and bulk import support.
- Technologies: React.js, Node.js, Express.js, PostgreSQL, Multer, Barcode Scanning, QRCode, CSV/Excel Import, Nginx, AWS EC2, Certbot.

Mini Projects

Netflix Clone

[GitHub](#)

- Developed a fully responsive Netflix clone using React, replicating key UI and functionality while ensuring a smooth user experience.
- Integrated Firebase Authentication for secure login and session management, with TMDB API fetching category-based content (popular, upcoming, top-rated).
- Technologies: React, Firebase Authentication, TMDB API, CSS.

Event Management System

[GitHub](#)

- Designed relational schemas for events, participants, and their associations, ensuring efficient data organization.
- Implemented advanced SQL queries for CRUD operations, optimizing database performance and data retrieval.
- Technologies: Express.js, Node.js, PostgreSQL.

Public Video Chat Room

[GitHub](#)

- Developed a peer-to-peer video chat application enabling direct video calls with controls like mute/unmute and video toggle.
- Implemented secure cross-device communication via HTTPS tunneling using ngrok and optimized session handling with WebRTC signaling.
- Technologies: WebRTC, JavaScript, ngrok, HTTPS.

Educational Institution Platform

[GitHub](#)

- Developed a full-stack platform with separate user and admin portals for seamless course management and content interaction.
- Admin portal enables course creation, blog management, and user interactions, while the user side provides a smooth learning experience with form-based engagement.
- Designed a responsive UI/UX with support for both dark and light modes.
- Technologies: Express.js, Node.js, MongoDB, Material-UI, Nodemailer.

Education

Bachelor of Computer Applications (BCA), Distance Education

Jun 2025 – Present

MERN Stack Development, Self-Learning Program

April 2024 – Present

Higher Secondary Education (Plus Two), PPMHSS Kottukkara

March 2024

Additional Information

Soft Skills : Self-Learning, Problem-Solving, Project Management, Efficient Communication, Research Skills

Languages : English, Malayalam
