Experience

Freelance E-Commerce & Web Solutions Developer — Self-employed

Remote

- Delivered production-ready web applications including e-commerce platforms, POS systems, ERP-style dashboards, and business management tools.
- Built and maintained a complete client e-commerce solution for AD21 Football Store, covering storefront, product management, checkout, payments, and admin workflows.
- Implemented product, inventory, order, customer, coupon, offer, and reporting workflows tailored for real business operations.
- Integrated online payment systems, authentication flows, email notifications, file uploads, and deployment pipelines for live projects.
- Supported website updates, maintenance, technical improvements, and business-oriented feature development for client projects.

Projects

AD21 Football Store E-Commerce Platform

Live [↗](#)

- Delivered a full e-commerce solution with a polished home page, featured products, banners, new arrivals, and a dedicated shopping page.
- Built detailed product pages with related products, wishlist, reviews, ratings, frequently bought together, and search autocomplete.
- Implemented advanced commerce flows including cart, buy now, coupons, offers, partial cancellation, retry payment, invoice generation, and order tracking.
- Added secure authentication with refresh tokens, access tokens, register/login, OTP verification, forgot password, and password reset inside profile.

- Built user dashboards for orders, wallet, cart, profile, and preferences such as dark/light mode, saved searches, and recently viewed products.
- Developed admin modules for products, categories, offers, banners, payments, coupons, users, staff accounts, approvals, feature flags, stock alerts, and stock updates.
- Integrated Razorpay payments, Cloudinary uploads, SEO meta tags per product, push/email notifications, referral-to-wallet flow, and PWA support.
- Technologies: React, Node.js, Express.js, MongoDB, JWT, Razorpay, Cloudinary, Tailwind CSS.

Noxsphere Platform

Live

- Co-founded and developed Noxsphere, a web platform for managing tournaments, auctions, and participant operations.
- Built admin dashboards for fixtures, standings, match events, player statistics, teams, and auction workflows.
- Developed real-world event and auction modules used for tournament organization and live tracking.
- Technologies: React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT.

Construction Management System

Live | GitHub

- Developed a role-based dashboard platform for Admins, Site Managers, Supervisors, Architects, and Clients.
- Implemented multi-role authentication with role-based access control, secure login, and protected API routes.
- Built dynamic dashboards with reporting filters and animated visual analytics.
- Designed workflows for blueprint uploads, milestone tracking, and project monitoring.
- Technologies: React, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, Axios, JWT.

POS & Retail Management System (PKS Traders)

Live

- Developed a retail management platform supporting inventory tracking, invoicing, barcode scanning, and payment processing.
- Implemented stock monitoring, sales reporting, customer management, and supplier management features.
- Built business dashboards providing sales analytics and inventory insights for daily operations.
- Technologies: React, Node.js, Express.js, PostgreSQL, AWS EC2.
